

Industry-recognized engineering experts
ready to help –

Wherever you need it.

SOFTWARE SOLUTIONS

From advanced analysis to data management, on your desktop
or in the cloud (and on your shop floor) – you're covered.

3D PRINTING

Giving you the best in additive and postprocessing
technology with a range in applications, materials
and price points to choose from.

3D SCANNERS

Change your design and prototyping game
with the latest 3D scanning technology to fit
your needs.

IMPROVE PERFORMANCE THROUGH TAILORED LEARNING

Whether you have decades of experience or you are just getting started, SolidProfessor can help you master skills in SOLIDWORKS, CAMWorks, 3D printing and other areas.

Explore over 7,500 online courses and an expansive library of resources – available anytime, anywhere.

ALL ACCESS BUNDLE

Unlock the best value with the full course library, live training, expert sessions and more resources at your fingertips.

FUNDAMENTAL BUNDLE

Get the best of both worlds with live, instructor-led training and one year of unlimited access to the SolidProfessor library.

NEW SERVICES!

ENTERPRISE

You know (better than most) how much engineers like to problem solve. So put our experts to use and let them guide you through your entire design to manufacturing process.

3D PRINTING AND SCANNING

You know (better than most) how much engineers like to problem solve. So put our experts to use and let them guide you through your entire design to manufacturing process.
